Vinyl Cutter

1. Stick the vinyl on the cutting mat, switch on the machine and insert the mat by clicking on ⌃

2. Open Silhouette Studio 🅢 and import an image with the button 📁 at the top left of the screen.
3. In the toolbox on the right of the screen, click on 🔲 for the vectorisation menu.

4. Choose the part of the image to be cut out with : 🔲 **Sélectionner la zone de vectorisation**
5. Remove the original image, so that only the red outline remains on the work surface.

6. Adjust the size if necessary.
→ It is advisable to place the cut-out at the top left on the worktop.

W 138,57   H 106,86   mm 🔒

7. Click on 🖨 ENVOYER at the top right of the software, to access the send tab, then connect to the machine by clicking on :

Cameo 4 Pro (F12E4F3D) ✅

Indisponible

8. Choose the Material used.
→ It is recommended to increase the Blade Depth « *Profondeur de lame* » by 1.

9. Start cutting by clicking on **ENVOYER**

10. When the machine has finished, remove the cutting mat by clicking on ⌄

11. For complex vinyl transfers, a clear adhesive is recommended.
Apply it by pressing it onto the vinyl and peel it off, trying to get the vinyl to stick to it.
